

## C++ Software Engineer:

To apply for this position, click [here!](#)

Are you a Software Engineer who loves architecting and implementing solutions using C++ and Windows APIs? Do you enjoy using a variety of tools and technologies to solve problems? Do you want to be part of an exciting, innovative, and fast paced growing software company? Do you value delivering highly innovative code & designs for our users and customers?

Our Research & Development organization is looking for a highly-motivated C++ Software Engineer who will help the company advance our software to the next level of quality and scalability by designing, implementing, and creating products that work in a web based, multi-tenant, secure cloud environment.

### WHAT YOU'LL BE DOING~

You will be working with people whose passion for creating outstanding software matches yours. Collaborate, brainstorm and work in an interactive, dynamic and rewarding environment that will challenge your skills and help you achieve the next level of your career. You will have the opportunity to work on a web based software suite that has not only set a new standard for call center software, but has driven innovation within the entire industry. You will also be able to participate on a highly skilled team of other Software Engineers who are redefining our market space.

### DO YOU HAVE THESE DIFFERENT TALENTS?

- Bachelors' degree in Computer Science or related field
- Demonstrated skills with proficiency in REST APIs, JSON data, accessing SQL data
- Large scale, multi-threaded data processing applications
- 4+ years' experience using C++ with Windows APIs in an enterprise class environment
- Skilled in Agile development methodologies (including unit testing and continuous integration)
- Great attitude!
- Bonus Points!
  - Experience in video or audio processing
  - Experience using JIRA and Confluence

**If you enjoy being challenged, and want to grow your talent to the next level, then Calabrio is looking for you!**

### CALABRIO STANDARD COMPETENCIES
