

Integration Engineer

To apply for this position, click [here!](#)

Are you a Integration Engineer looking for your next opportunity to make a difference? Do you enjoy using the latest tools and technologies to solve problems? If your answer is, yes then Calabrio wants to talk to you!

Our Analytics team is looking for a highly-motivated Integration Engineer who will help advance our analytics software to the next level of quality and scalability by designing, implementing, and creating products that work in a web based, multi-tenant, secure cloud environment. Collaborate, innovate, and work in a dynamic and rewarding environment that will challenge your skills and help you achieve the next level of your career.

WHAT PROBLEMS WILL YOU BE SOLVING?

You will be working on our Analytics product that will help the company deliver market leading data analytics software within our workforce optimization suite of products. This work will require you to work on distributed our data processing engine that will be the backbone for the next generation analytics and business intelligence application.

WHAT SKILLS WILL MAKE YOU SUCCESSFUL?

- Expertise with admin and performance tuning of enterprise RDBMS systems: MS SQL Server or Oracle preferred
- Expertise with admin and performance tuning of NoSQL databases: ElasticSearch preferred
- Experience in design, build, testing, deployment and monitoring of data integration processes (stored procedures, scripts and ETL tools)
- Proficiency in scripting languages like Unix shell scripts or Windows batch scripts
- Development background with server and client technologies/languages: Javascript, JS Libraries, SOAP and REST web services, SSO, APIs, Java
- Excellent verbal, written, and interpersonal communication skills
- Knowledge and experience in working with contact center and workforce management systems is a plus

WHAT IS REQUIRED FOR YOU TO APPLY?

- Bachelors' degree in Computer Science or related field
- 3+ years' database experience and/or data integration experience
- Skilled in Agile development methodologies (including unit testing and continuous integration)

WHAT VALUES ARE IMPORTANT TO CALABRIO?

- Collaboration amongst teams
- Open communication across the company
- Ambitious
- Accountable
- Customer Success
