

## Performance Test Engineer

To apply for this position, click [here!](#)

Do you consider yourself a Performance Test Engineer who is highly motivated, passionate about what you do, and love a wide variety of challenges? If so, then keep reading!

### WHAT PROBLEMS WILL YOU BE SOLVING?

Our Research and Development organization is looking for an innovative Performance Test Engineer, who will be responsible for preparing test strategy and plan for performance testing and performing test execution based on the plan. Responsibilities also include reporting test results and working closely with developers for in-depth analysis to find and rectify the root cause of any performance issues.

### WHAT SKILLS WILL MAKE YOU SUCCESSFUL?

- Create test strategy and test plan for performance and load testing on large-scale enterprise applications
- Develop robust test scripts that accurately reflect expected user load
- Execute planned performance, stress, and load testing on our applications.
- Collect all key performance measurements to be interpreted to present performance characteristics and trends of our applications.
- Set up and maintain performance/longevity test labs that will require to be updated for each release cycle.
- Manage hardware and software environments used for testing
- Work cross functionally to gather input on test scenarios
- Drive continuous performance monitoring and improvement to ensure reliability, stability, and scalability of our application.

### WHAT IS REQUIRED FOR YOU TO APPLY?

- 4-year degree in Computer Science or similar field
- 5+ year experience in performance testing
- 5+ year experience with web-load performance testing and its analysis
- Strong expertise in load test tools - HP Performance Center, JMeter, LoadRunner, or any other performance measurement tools
- Proficient at performance trouble shooting (heap dump & thread dump analysis)
- Enthusiastic and curiosity about performance bottlenecks from observed behaviors and going the extra miles to understand root cause in the complicated test conditions
- Ability to lead performance optimization efforts with a strong command of complex performance issues and the ability to direct component owners

### WHAT VALUES ARE IMPORTANT TO CALABRIO?

- Collaboration amongst teams
- Open communication across the company
- Ambitious
- Accountable
- Customer Success!

Calabrio, Inc. is an Equal Opportunity Employer that values diversity at all levels. All qualified applicants will receive consideration for employment without regard to race, color, religion, gender, national origin, age, sexual orientation, gender identity, disability or veteran status.
