

Quality Assurance Engineer

To apply for this position, click [here!](#)

Are you a Software Tester that has a passion for quality? Do you want to be part of an exciting, innovative, and fast paced growing software company? Do you value delivering highly innovative products with high quality for our end users?

Our Research and Development organization is looking for highly motivated people who will help the company advance the software to the next level of quality and scalability by designing, implementing, and testing our products in the most efficient way.

WHAT PROBLEMS WILL YOU BE SOLVING?

Our quality assurance engineer's work in teams and plan testing efforts, develop, maintain, and execute test scripts, database validation, install testing, software and web testing. The quality assurance engineers participate in all phases of a project, from user story review, design, demos to final system testing and launch. You will work as part of agile teams, must be a self-starter, and have strong communication and interpersonal skills, as well as a strong attention to detail.

WHAT SKILLS WILL MAKE YOU SUCCESSFUL?

- Good troubleshooting and creative problem solving skills
- Be able to create test designs from minimal documentation and user stories
- Good verbal, written and interpersonal communication skills to interact with team members, senior support personnel, high level personnel and customers
- Familiar with a product or project life cycle and what is required at each phase for testing

WHAT IS REQUIRED FOR YOU TO APPLY?

- Bachelors' degree in Computer Science or related field
- 2 years' experience in software testing
- Experience testing software for sale
- Create/write test scripts for manual execution based on user stories
- Skilled in Agile development methodologies
- Experience scripting in Shell or VBScript (Nice to have)

WHAT VALUES ARE IMPORTANT TO CALABRIO?

- Collaboration amongst teams
- Open communication across the company
- Ambitious
- Accountable
- Customer Success!
