

Senior Software Developer – Full Stack Java

To apply for this position, click [here!](#)

Are you an experienced software developer who creates world class software? Can you create rock solid, scalable software? Are you able to develop both back end services and front end user interfaces that will amaze our users?

Our development organization is looking for a highly motivated Software Engineer who will help the company deliver market leading software in our workforce optimization suite of products.

WHAT YOU'LL BE DOING~

- Develop back end services in core Java technologies.
- Develop UI code in JavaScript, HTML, CSS and related technologies.
- Help shape strategic software offerings for customers
- Design, code, review and test modules
- Join a fast paced team and work in a high energy collaborative environment

DO YOU HAVE THESE DIFFERENT TALENTS?

- Someone with a passion for creating software
- 4+ years of server side development in Java
- 2+ years of UI development using JavaScript
 - Experience with Dojo or AngularJS is a plus
- 1+ years of experience with SQL
- Strong belief and experience in practices that enhance quality like code reviews, automated tests, and continuous integration
- Experience in building highly scalable software components that are robust and secure
- Excellent communication skills; written and verbal
- Strong troubleshooting and problem solving skills
- 4 year degree in Computer Science or equivalent – required
- Knowledge of the contact center industry is a bonus!

If you enjoy being challenged, and want to grow your talent to the next level, then Calabrio is looking for you!
