

Software Engineer in Test

To apply for this position, click [here!](#)

Do you consider yourself a Software Engineer in Test who is highly motivated, passionate about what you do and love a wide variety of challenges? Do you have a passion with using a variety of tools and technologies to solve problems? Do you want to be part of an exciting, innovative, and fast paced growing software company? Do you value delivering highly scalable and the highest quality software?

WHAT PROBLEMS WILL YOU BE SOLVING?

Our Research and Development organization is looking for highly motivated Software Engineer in Test who will help the company advance the software to the next level of quality and scalability by designing, implementing, and creating tools, automating manual processes, automating functional tests, and helping drive scalability in the most efficient way.

WHAT SKILLS WILL MAKE YOU SUCCESSFUL?

- Ability and willingness to use multiple tools or languages to get the job done
- Experience automating with Selenium
- Any call center or telephony domain experience
- Experience with load, scalability and performance testing
- Experience in automating software in a way that is not record & playback (not QTP, RFT, etc.)
- Experience using VMware
- Any call center or telephony domain experience
- Experience with load, scalability and performance testing

WHAT IS REQUIRED FOR YOU TO APPLY?

- 4-year degree in Computer Science or similar field
- 3+ years experience with test automation coding
- Minimum of one year with Object Oriented Development in Java, C# or C++
- Experience scripting in Python, Perl, Shell or VBScript
- Script in at least one language such as Python, Perl, Shell and VBScript

WHAT VALUES ARE IMPORTANT TO CALABRIO?
